19	FCRA registration number	094440130 (Under process of renewal)
20	Name of the activity for which CSR Funding is asked for	To Provide 10KVA Solar Energy Plant
21	Detailed Proposal & time line	Attached
23	Total Amount Asked for Rs.	<b>INR 11,20,000/-</b>

## New CSR Funding Proposal to 10KVA Solar Energy Plant for

### **UTKARSHA SCHOOL** **FOR UNDERPRIVILEGED CHILDREN**

#### **SUMMARY:**

Mahesh Foundation has been supporting HIV+ kids since 2010 with Food, Shelter, Medicine, nutritional supplements etc. The foundation currently supports around 50 orphans at our shelter home "Ashakiran" in Belagavi. With the help of generous support from Textron and \*other corporates the Foundation was able to build excellent

infrastructure for a school – Utkarsha Learning Center and shelter home. This school caters to special children from the shelter home and also underprivileged, disadvantaged and neglected children from slums of Belagavi.

#### **PROBLEM STATEMENT:**

Ashakiran provides shelter to about 50 children that are medically challenged and have lost either or both parents. The current infrastructure provides them with a secure and clean living space. However one of the basic needs for these children for electricity is becoming difficult to procure.

The supply is erratic and causes issues for the children when there is a power cut. In addition, the power bills are getting bigger putting stress on the resources of the foundation.

### **PROJECT OBJECTIVES:**

The current infrastructure in the home provides basic infrastructure like beds, clean and nutritious food etc. We now want to also provide them with continuous power that is independent of the grid.

We want to make sure that our children enjoy clean drinking water through the water purifiers installed on each floor. We want to ensure the children are able to study during the evenings using electric lights, switch on a fan during the summer months etc. This is only possible if we can install and operate an efficient SOLAR POWER GRID that is independent of the state supply grid.

We will also be able to educate the children about the use of non-conventional energy sources and conservation of natural resources.

### **PROJECT IMPLEMENTATION AND MANAGEMENT PLAN:**

The shelter home currently houses about 50 children that are medically challenged. We need about 7-9 KW power for their requirement. Considering the possibility of expansion, we want to build a 10 KW Solar Power grid with sufficient solar panels and batteries to store power during the sunlight hours.

We intend to approach our partners and renowned solar power company, SELCO as our first choice of suppliers. We have worked with them for the last 5 or more years in various projects.

### **PROJECT BUDGET:**

The total cost to install a 10 KW solar grid including materials and installation / commissioning is approximately INR 11,20,000/-

### **PROJECT IMPACT:**

What will be the impact on completion of project? Or What will be the outcome of the project?

The Solar Power Grid will provide sufficient and uninterrupted power supply to our care home. This will improve the health of the children, improve their academics and provide a sense of completeness to the home.

Academics for our children is a major area of our concern since they need to be equipped to step out when they turn 18. While Solar Power alone will not ensure this, it will be certainly a very important contribution towards their academic success.

**BENEFICIARIES:**

Beneficiaries of these Solar Energy are HIV infected children who sheltered at Mahesh Foundation's care home, slum children who are getting the education at school of Mahesh foundation, and community underprivileged children who study in the Government schools but lack such privileges at their schools as well as homes. This will help 500-600 children could benefit by these classrooms.

**BRANDING:**

We promote your company for sponsoring the classrooms. We display your company logo in the proposed Solar plant. This will be helpful to you for Corporate Social Responsibility (CSR) and related activities. We have individual supporters who visit our premises and through this promotion, your organization can get better brand recognition and a positive business reputation.
